

Marine Invertebrate Scavenger Hunt

AQUARIUM

Classroom Notes

In your school classroom fill out the left column below with notes on the types of marine invertebrates that you will see.

At the Academy

While on your fieldtrip find an example of each of the marine invertebrates. In the right column sketch the animal and answer the questions below.

Cnidarian Notes

Anatomy (defining body parts):

Examples of Cnidarians:

Cnidarian at the Academy

Sketch:

What other animals are found in this animal's environment?
Do the other animals interact with the cnidarian?

Arthropod Notes

Anatomy (defining body parts):

Examples of Arthropods:

Arthropod at the Academy

Sketch:

How does this animal move around? Where does it go?

Name _____ Date _____

Echinoderm Notes

Echinoderm at the Academy

Anatomy (defining body parts):

Sketch:

Examples of Echinoderms:

Describe this animal's environment. How do you think it is adapted to live there?

Mollusk Notes

Mollusk at the Academy

Anatomy (defining body parts):

Sketch:

Examples of Echinoderms:

What do you think this animal's predators are?

Questions From Your Notes

Find Answers at the Academy

Write down some questions you have about marine invertebrates.

To find some answers: observe animals, talk with a docent in the exhibits or visit the Naturalist Center on Level 3.
