# Frogs and Toads

## Section 1: Observations

Draw or use the word banks to make observations about the frog or toad and their habitats in the chart below.

<table>

</tbody>
</table>

This activity takes place downstairs, in the aquarium.

Name: ___________________________ Date: ________________

- Small
- Large
- Flat
- Bulgy

- Colorful
- Black
- Slit pupils
- Round pupils

- Webbed toes
- Non-webbed toes
- Large feet
- Small feet

- Claws
- Circular toes
- Front and back are the same

- Round
- Long
- Flat
- Smooth skin

- What color?
- Patterned
- Solid color
- Bumpy skin

- Is there water?
- What kind of plants do you see?
- Is there food?
- Are there hiding places?
Section 2: Matching Game
Draw a line to connect the frog’s picture with its natural habitat.
Hint: Where might the frog be the most camouflaged?

Green Tree Frog – a lake
Surinam Toad – green river bank
Vietnamese Mossy Frog – shallow water and fallen leaves
Lake Oku Clawed Frog – mossy rocks and riverbanks

Section 3: Seek and find the answer.
Circle the correct answer to complete the following statements:

a. Frogs and toads with eyes that point up to the sky usually live (a) in the water (b) on land.
b. Non-webbed feet are useful to frogs and toads who spend most of their time (a) swimming (b) climbing.
c. When an animal is in its habitat the color and shape of its body help it to (a) blend in (b) stand out.
d. An animal’s (habitat/ body) is adapted to survive in it’s (habitat/ body).

Section 4: Draw the habitat a specific frog needs.
Imagine you have a frog that has yellow stripes, webbed feet, and eyes that point up. Based on the frog’s adaptations what does it need in its habitat?
