Even though *Tyrannosaurus rex* was one of the largest predatory dinosaurs, its arms were only about as big as an adult human’s—and each hand only had two fingers!

Create your own *T. rex* puppet from a paper bag and bring it to life.

What do you think *T. rex* sounded like?

**Materials**

Printed template (pages 2–3)
Craysons or markers
Scissors
Glue stick
Paper bag (Small, #4 size is recommended)

**Directions**

1. **Print**, **color**, and then **cut-out** the *T. rex* face and mouth on pages 2 and 3. Only cut along the wide black outline around the face and the rectangle around the mouth.

2. **Place** the paper bag in front of you with the folded flap facing up.

3. **Apply glue** to the back of the square mouth. Then, **press** it onto the front of the paper bag while making sure to tuck the top of the mouth under the folded flap.

4. **Apply glue** all over the folded flap. Center the face on top of the folded flap and try to line up the bottom of the face with the bottom of the mouth. **Press** the face onto the folded flap. Remember, you don’t want the bottom of the face to get glued down!

5. **Allow to dry** for 5 minutes. Then put your hand inside the paper bag to bring your *T. rex* to life!
